

## TECHNICAL DATA SHEET

### FA600 Foil adhesive

**General information:** FA 600 is an oil based soft adhesive, that suitable to bind the foil metallic film to fabric, it is typically formulated from special mixture of thermoplast homo and co-polymers including such additives.

To achieve an excellent adhesion, a uniform printing film must be applied and dried before applying the foil onto the fabric using heat transferer press, the quality depending on the printing skills and foil characteristics.

**Applying conditions:** dry at 80C° for 2min., transferer at 170 C° for 10sec.

**Commercial trademark:** GREEN INK SEIRES

**Printing parameters:**

Squeegee medium to hard "65-90D".

Mesh-count: (43"-36")

Photo emulsion: solvent resists.

**Clean up:** solvent ink cleaner

**Storage:** avoid freezing and high temperature.

**Packages:** 1kg-5kG-20kg

**Note:** please mix well before use and test all parameters before production.
